Public works Report – October 2026

During the month of October, the Town of Lake City produced 11,072,620 gallons of safe drinking water. The Wastewater Treatment Plant processed 2,742,157 gallons of wastewater. For comparison, in October of last year, the Town produced 14,145,600 gallons of water and processed 2,518,314 gallons of wastewater.

Water

The data logger has been installed in Ballfield Well. The data logger in Bluff Well will be installed in early January, which will bring us into full compliance with the state. Interior repairs on Morningside Tank have been completed. Public Works has been working diligently to compile an inventory of water meters in preparation for future grants.

Wastewater

Public Works assisted with the installation of the covers for the wastewater treatment plant. The work was quite time consuming.

Streets and Alleys

Public Works has been performing much needed road maintenance since the backhoe repairs were completed. There are still a few small issues with fuel pump timing that affect starting but otherwise it's completely operational.

Other

We have been preparing for the winter months by storing signage and shutting down park facilities. Public Works has also been assisting Parks and Recreation with ice wall preparations.

Thank you,

Ethan Wuest

Interim Public Works Director
